

The Genogram Game

As a team, please create a genogram for the following family. Please be sure to indicate emotional relationships with the symbols we learned in class and create a key for any other information that does not have assigned symbols.

1. The Green Family: Sally (born 1955) is the youngest daughter of Frank (1920-2000) and Loretta (born 1925), who were married until Frank died. Sally has an older brother, George, who is married to Francine. George and Francine have had two miscarriages. Because of their difficulty having children, George and Francine have a rocky relationship. Sally married Johann in 1982, and they divorced in 1990. Together they had one child in 1984, a daughter named Simone. Sally remarried in 1997 to Omar, and they are still married. They have twin sons, Bobby and Billy, born in 1999. The nuclear family is Sally, Omar, Billy, Bobby, and Loretta. The relationship between Sally and Lorraine could be described as fused. The Green family places a high value on education, and several family members have advanced degrees (Frank, Jane, Sally, and Omar).

Johann Loretta
